Monday welcome and technical briefing

We start with FORDs Medical and Health and Natural Sciences, because Prof. Ing. Roithová will leave on Wednesday evening. On Monday, I recommend choosing a space at the Faculty of Medicine, if you are interested, a MEP tour of SIMU, then a move to CEITEC, after the end of the program for those interested, a tour of the laboratories, dinner by the evaluators themselves/informal possibility of all-day sum up

We continue with FORDs Natural Sciences (ICS, FI) due to the departure of prof. Roith, Pharm added after ICS, then continue with Social Sciences. I recommend the FI (cyber campus), then a move to Law, dinner by the evaluators themselves/ informal all-day sum up option

We continue with FORD Arts and Humanities at the Faculty of Arts, where there could be, if MEP is interested, for example, a tour of Humelab and the library, then a move to FSS, Dinner ideally at the end with the rector

first block: writing arguments for points and texts of the M3 report (evaluators per FORDs), **second block:** joint writing of arguments for points and texts of the M4-M5 report, **third block:** all discussion and voting on points for all M3 + M4 - M5; **SUM UP** for management: summary on what have been discussed, expected completion of evaluation reports
